

# BMS ESPAÑA (BMS SPAIN): 2022 DATA SUMMARY

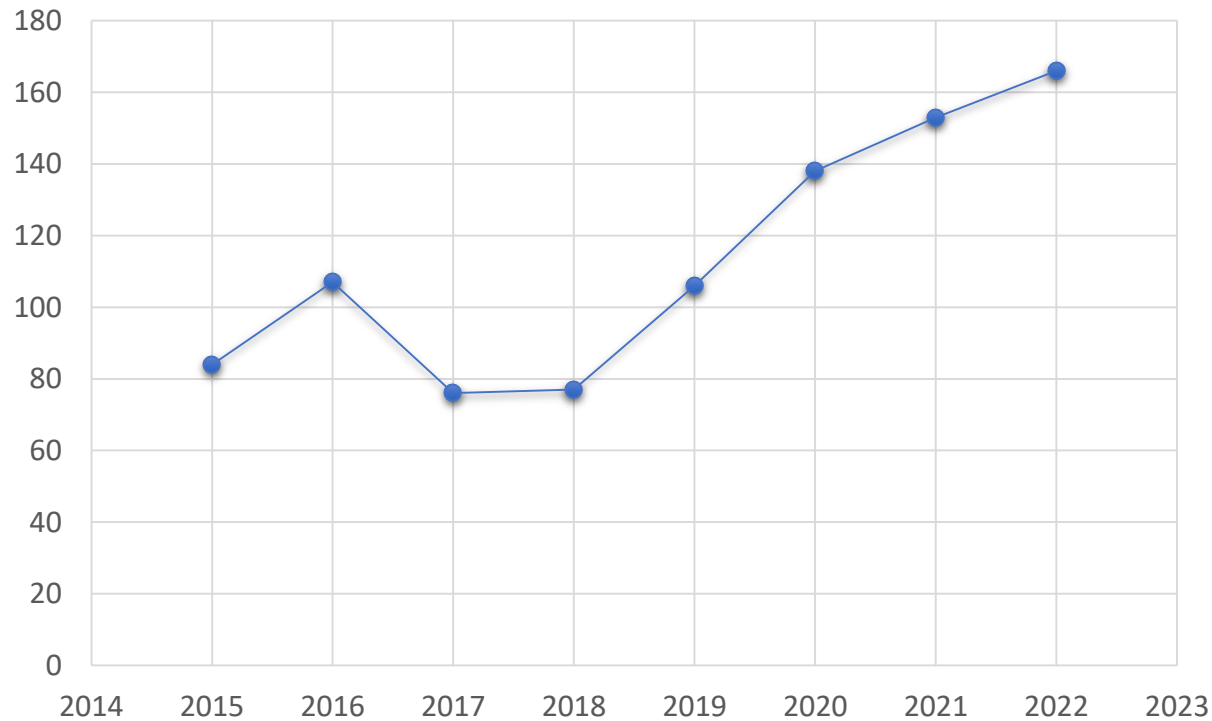

- Number of recorded butterflies until november 2022: **626,793**
- No Transects with data: **211**
- In 2022:
  - Recorded butterflies: **102.281**
  - Recorded species: **204**
  - Active transects: **166**
  - Visits were made during **all** the weeks of the year (data until week 47)

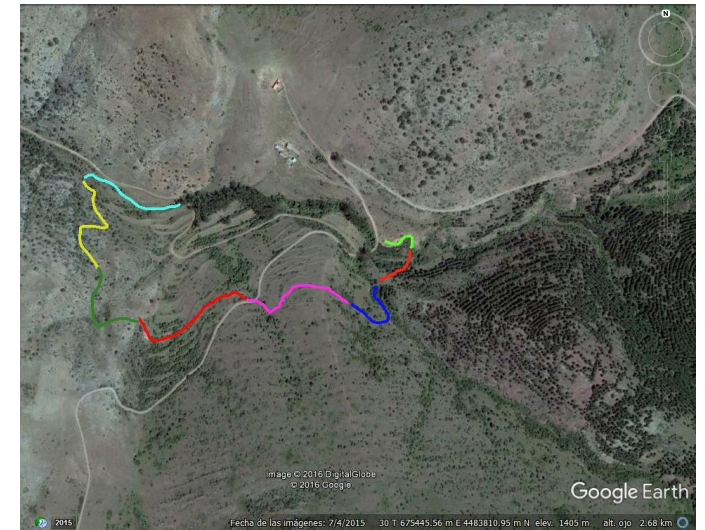

**We have 236 transects in the network  
and 166 have been active in 2022**

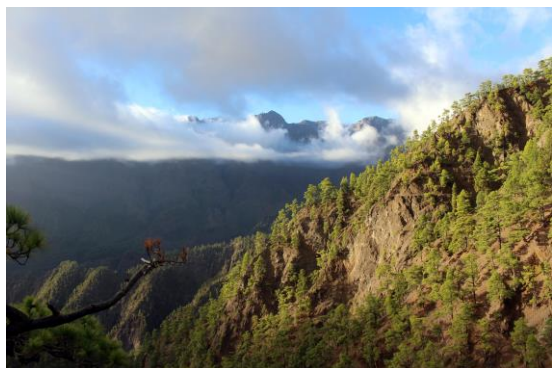

**Active transects per year**

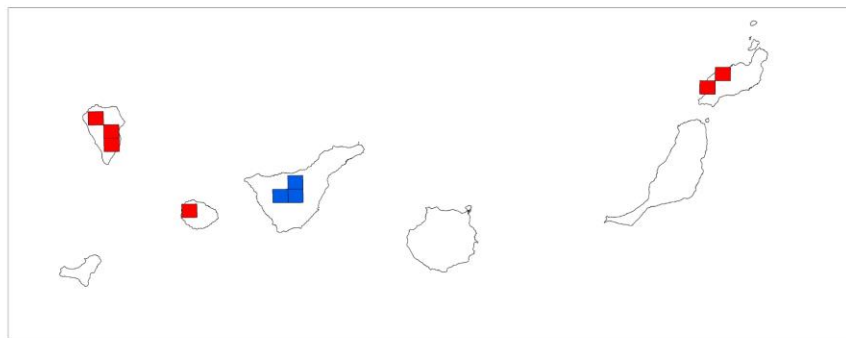

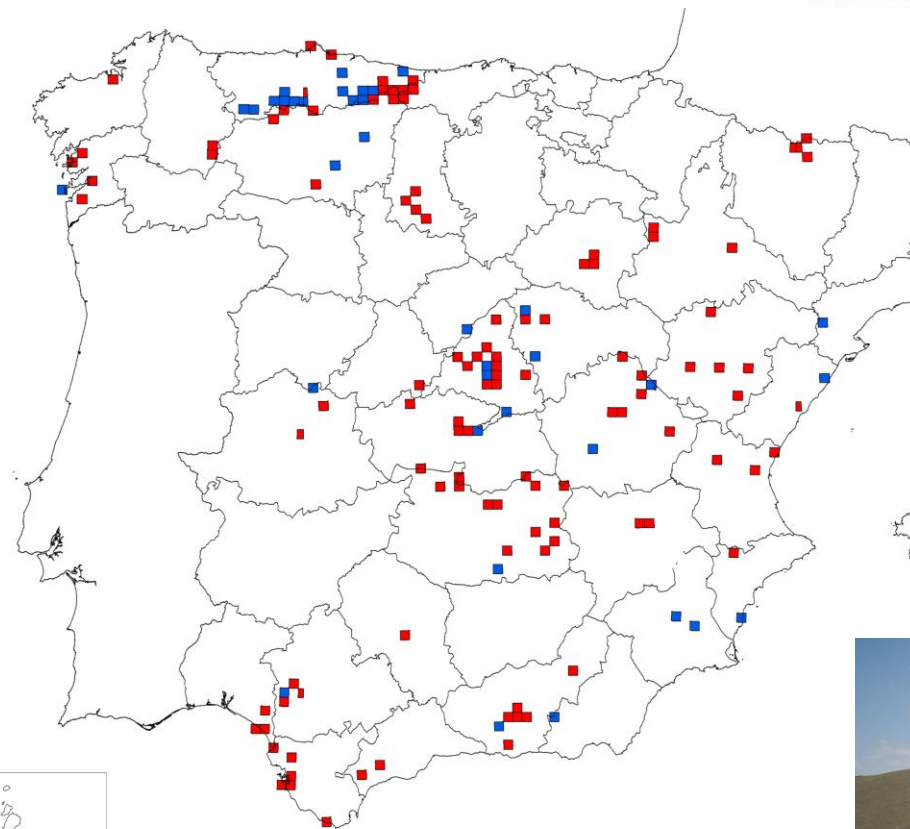

**Average number of species  
recorded per transect  
(2015-2022) is 48**

166 active transects (red) and 70 non active (blue). Year 2022

 **Transectos activos**  
 **Transectos no activos**

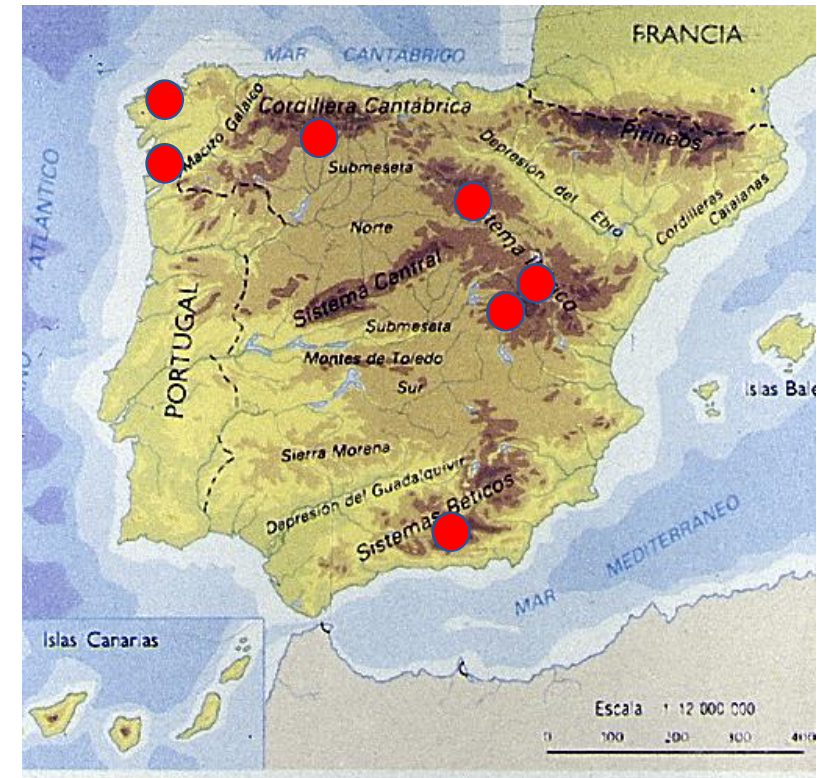

The number of recorded butterflies declined in 2022 (102,281) when compared with 2021, despite having a similar number of transects

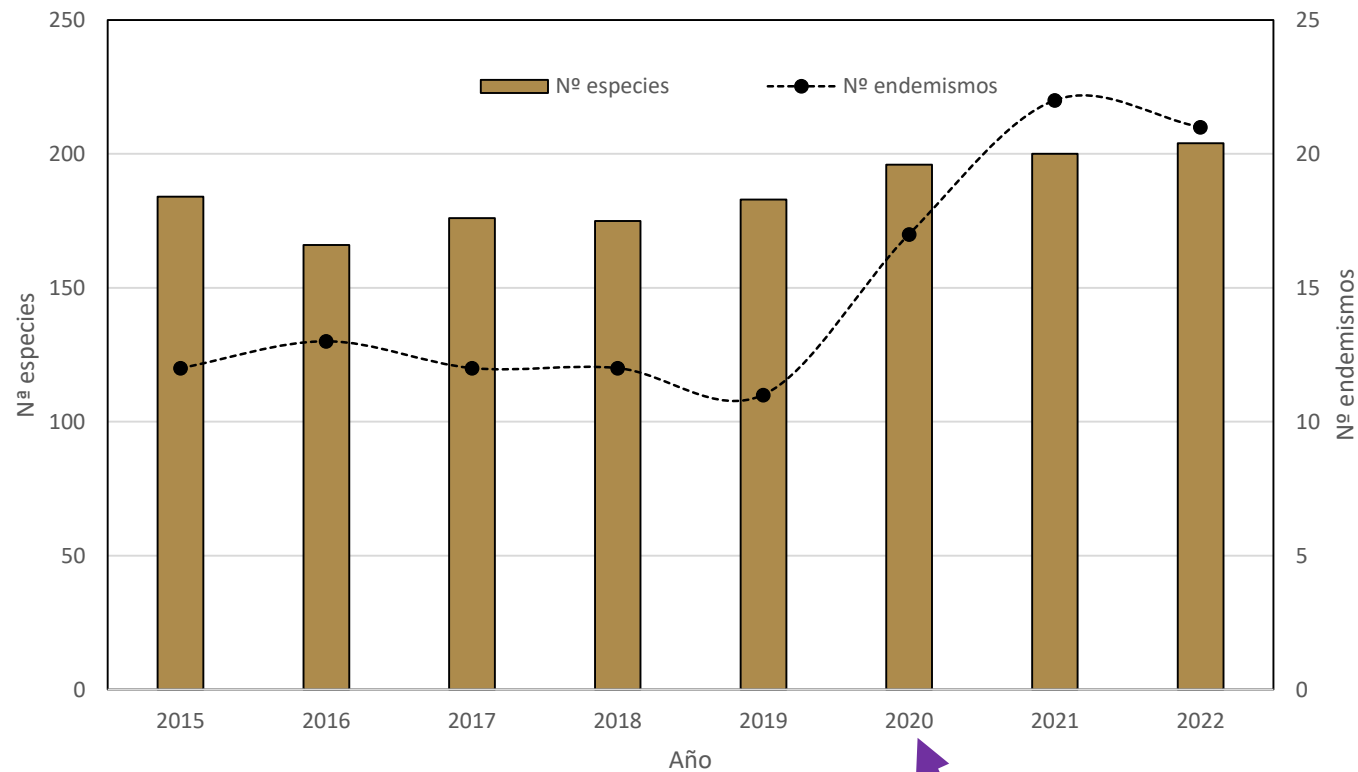

Despite this year's results, 13 transects recorded each one more than 2,000 butterflies during 2022

Nepas, Soria: 5574  
butterflies

The total number of recorded species is stable in the last years around 200 especies (204 in 2022). The same applies to endemic species (21 in 2022)
